www.zfi.ch

Required field (client side)

The screenshot shows a web browser window with three tabs: 'Home', 'demoform - XPage', and 'ZFIDemo.css'. The page content includes a 'Demo' heading and a form field labeled 'Name *' with the text 'Name' inside. To the right of the field is a red error icon and the text '{Error Message}'. Below the browser window is a design tool interface with a 'Properties' pane on the left and a 'Validation' section on the right. The 'Required field' checkbox is checked and highlighted with a red box. The 'Required field error message' is set to 'Bitte Name eintragen'. The 'Validate String Length' section is also visible, with fields for 'Minimum' and 'Maximum' characters, and a 'Validation error message' field.

Required field (server side)

The screenshot shows a web development tool interface with the following elements:

- Browser tabs: Home, demoform - XPage, ZFIDemo.css
- Page title: Demo
- Form field: Name * Name
- Error message icon: [Error Message]
- Design/Source tabs
- Properties panel: Display Error, Style, Font, Background, Margins, All Properties
- Options panel: Name: message1, Visible (checked), Show error messages for: inputText2, Show error details (checked), Show error summary (unchecked)

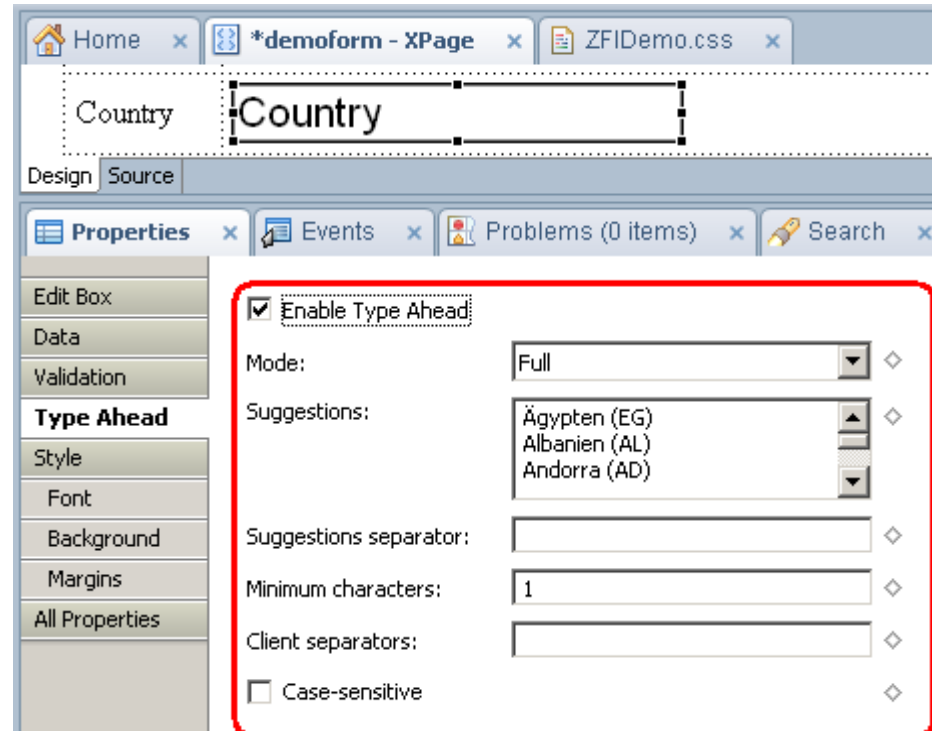

Red boxes highlight the error message icon and the options panel. A red arrow points from the error message icon to the 'inputText2' dropdown in the options panel.

Date picker

The screenshot shows the Lotus Domino Designer interface. At the top, there are browser tabs for 'Home', '*demoform - XPage', and 'ZFIDemo.css'. Below the tabs, the design view shows a form with two fields: 'Name *' and 'Date'. The 'Name' field contains the text 'Name' and has a red error message icon next to it with the text '(Error Message)'. The 'Date' field is empty and has a date picker icon on its left side.

Below the design view, the 'Properties' pane is open, showing the 'Data' section. The 'Bind data using' section has three radio buttons: 'Simple data binding' (selected), 'JavaScript', and 'Advanced'. The 'Data Binding' section has three fields: 'Data source' (set to 'dominoDocument1'), 'Bind to' (set to 'Date'), and 'Default value' (empty). The 'Display type' is set to 'Date/Time'. The 'Display type options for Date/Time' section has several options: 'Display format' (set to 'Date only'), 'Use date/time picker pop-up' (checked and highlighted with a red box), 'Date style' (set to 'Short (3/13/09)'), 'Time style' (set to 'Default (11:30:47 PM)'), and 'Pattern' (empty).

Type Ahead

Type Ahead

The screenshot displays the Lotus software interface. On the left, a vertical sidebar contains several tabs: 'Edit Box', 'Data', 'Validation', 'Type Ahead', 'Style', 'Font', 'Background', 'Margins', and 'All Properties'. The 'Type Ahead' tab is selected, showing a checkbox for 'Enable Type Ahead' which is checked. Below it, the 'Mode' is set to 'Full' and 'Suggestions' is set to '{Computed}'. A red box highlights the 'Suggestions' field.

The main area shows a 'Script Editor' window. The title bar reads 'Script Editor'. Below the title bar, there is an information icon and the text 'Write a JavaScript expression to compute the value.'. The 'Language' is set to 'JavaScript (Server Side)'. The 'Condition' section has two radio buttons: 'Compute Dynamically' (selected) and 'Compute on Page Load'. The script editor contains the following JavaScript code:

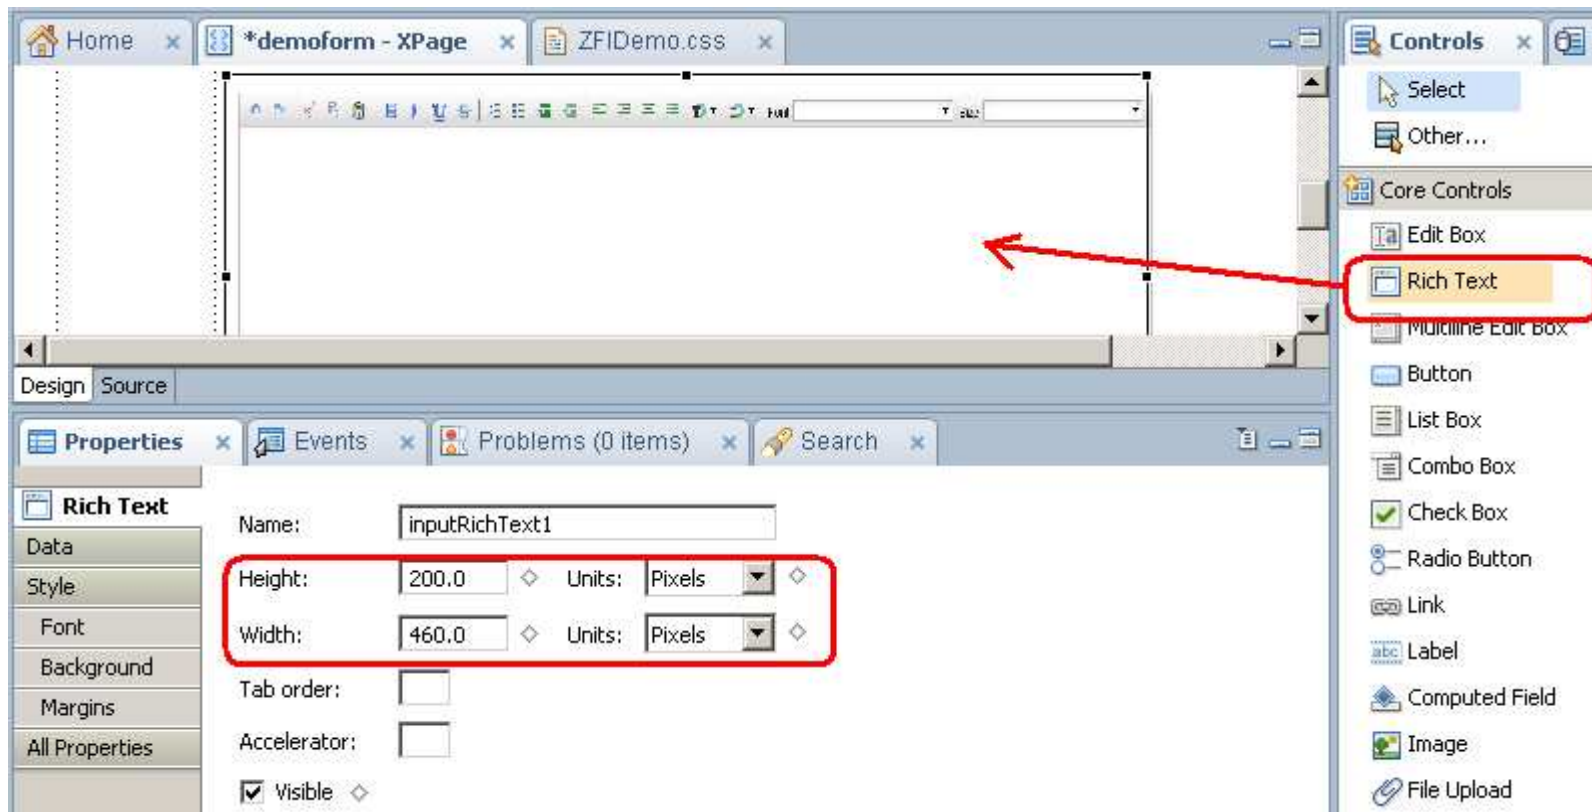

```
var dbname1 = new Array("", "notesnet\\SwissCities.nsf");
var view1 = "TypeAheadCity";

var dbname2 = new Array("", "");
var view2 = "Keywords";

@DbColumn( "", view2, 1 )
```

On the left side of the script editor, there is a 'Libraries' list. The '@Functions' library is selected and highlighted with a red box. Below it, several functions are listed, including '@Char', '@Contains', '@Count', '@Created', '@Date', '@Day', and '@DbColumn'. The '@DbColumn' function is also highlighted with a red box. At the bottom of the script editor, there is a checkbox for 'Show advanced JavaScript' which is unchecked. The 'OK' and 'Cancel' buttons are visible at the bottom right of the script editor window.

Notes/Domino Releases

- Version 1.0 – Dezember 1989
 - DOS 3.1, DOS 4.0, OS/2, Novell

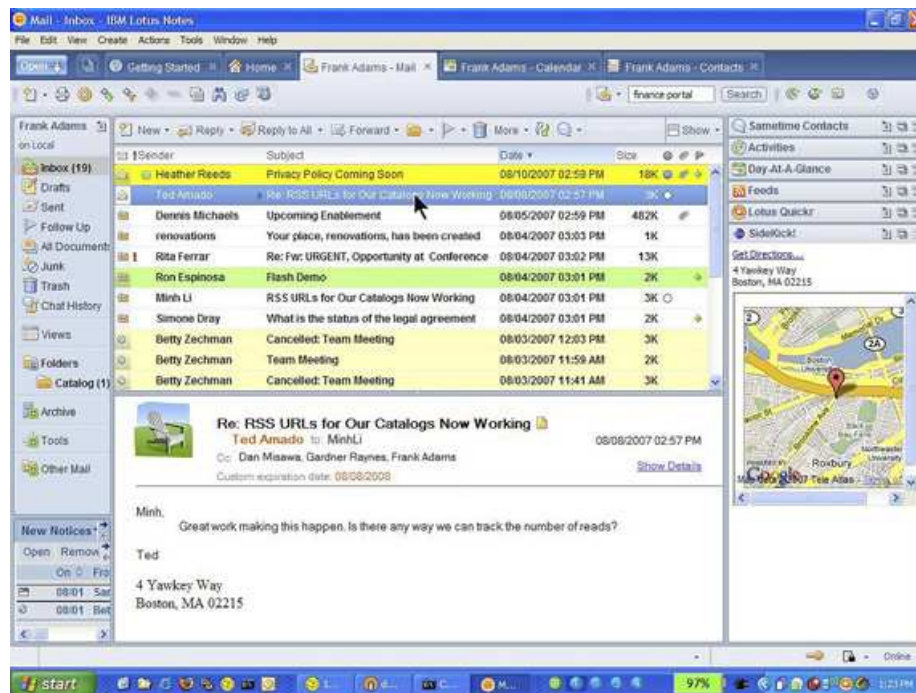

Notes / Domino Releases

- Version 6.0 – Oktober 2002
 - Server Performance / Scalability
- Version 6.5 – September 2003
 - IM Integration, DWA (Webmail)
- Version 7.0 – August 2005
 - DDM, 1024 RSA Keys, Reliability, Policies
- Version 8.0 – August 2007
 - Eclipse Client, Mehrere Client Plattformen

Notes/Domino Releases

- Version 8.5 (Januar 2009)
 - Win 2008, zLinux, Mac OS X, Ubuntu

Erfolg von Lotus

- Zahlen von Bob Picciano, CEO Lotus:
- 145 Millionen Notes User
- 46'000 Kunden
- Seit 4 Jahren ständiges Wachstum, zweistellig in Q1/Q2/Q3/2008 mit 12'000 neuen Kunden
- Microsoft sagt seit Jahren: «Notes is dead» ☺

IBM Notes/Domino 8.5

- Verfügbar seit Anfang Januar 2009
- Fokus auf Performance
 - Hard-Disk Usage
 - I/O Rate
 - I/O Bandwidth
 - Usability / Servicability
- Viele kleinere Ergänzungen / Funktionen

IBM Domino 8.5 Plattformen

- MS Windows Server 2003/2008 (32/64-bit)
- Novell SUSE SLES 10 (32/64-bit)
- Red Hat RHEL 5.0/5.1 (32/64-bit)
- Sun Solaris 10 (64-bit Kernel)
- IBM AIX 5.3/6.1 (64-bit Kernel)
- IBM zLinux (64-bit)
- IBM i 5.4/6.1 (128-bit)

IBM Notes 8.5 Plattformen

- Windows:
 - XP, Vista
- Linux:
 - SUSE SLED 10, RedHat RHEL 5.2, Ubuntu 8.04
- Mac:
 - OS X 10.5.5+

IBM Domino 8.5 Features

- Dynamic Group Policies
- Domino Configuration Tuner (Domino 7.0+)
- Notes Shared Login (<> Single Signon)
- Auto-Populated Groups
- Roaming
 - Unterstützung für Standard Client
 - Auch für File-Server (Shares)

IBM Domino 8.5 Features

- Unterstützung für Windows 2008 Server
- E-Mail-Signatur neu im Mail-File auch für iNotes (mit Attachments)

Signature

Servers Rules Severity

Domino Configuration Tuner

Server1/ABData/CH

Warning (High)

- database ODS version should be as high as possible.
- notes.ini CREATE_R8_DATABASES=1 enables the creation and upgrade of database versions to ODS 48.
- notes.ini DONT_CACHE_MONITOR_FORMULAS=1 will prevent caching of mail rule formulas to reduce memory consumption.
- notes.ini FTG_USE_SYS_MEMORY reduces memory fragmentation related to full text index searching (post 6.5.4 inclusive)
- notes.ini FT_FLY_INDEX_OFF=1 will prevent on-the-fly full text index creation thereby reducing disk I/O and CPU consumption
- notes.ini JournalLimitForwardToDomain eliminates some of the duplicate messages in the mail journaling database.
- notes.ini JournalLimitForwardToMailAddress limits journaling of messages forwarded to a forwarding address specified in a person document
- notes.ini JournalLimitForwardToSendCopyTo limits journaling of messages forwarded via a 'send copy to' mail rule.
- notes.ini LOG_MAILROUTING specifies how much logging detail the mail router sends to the server console and log file
- notes.ini NSF_BACKUP_MEMORY_CONSTRAINED limits the amount of memory used by backup applications and may prevent a server crash
- notes.ini SERVER_NAME_LOOKUP_NO_UPDATE can prevent unnecessary

Status:  One or more databases have not been upgraded to the latest available ODS.

Server:  Server1/ABData/CH running Domino 8.5 on Windows/XP 5.1 Intel

Severity:  Warning (High)

Explanation

Eventually, all active databases should be upgraded to the latest ODS version supported by the hosting Domino server. In general, the higher the ODS version, the better the server will perform. This is not an absolute best practice because relatively small, inactive databases will have a smaller influence on server performance. Therefore, it may not necessary to upgrade every single database to the latest ODS.

Database upgrade to ODS 48 can only happen if NOTES.INI includes CREATE_R8_DATABASES=1 for Domino 8 and 8.5.

Database upgrade to ODS 51 can only happen if NOTES.INI includes CREATE_R85_DATABASES=1 for Domino 8.5.

Recommendations

Upgrade existing databases as necessary via 'compact -c <database file name>'. Doing so will allow Domino to take advantage of various features associated with the latest ODS version.

Databases (5 reported)

Links & References

[Best Practice: The ODS for a given database should be upgraded to the latest ODS version supported by the hosting Domino server](#) (Source: Domino Wiki)

Datenbank Komprimierungen

- LZ1 Compression (Domino 6.5+)
- Design Compression (Domino 8.0+)
- Data Compression (Domino 8.0.1+)

<input type="checkbox"/>	Disable transaction logging
<input type="checkbox"/>	Don't support specialized response hierarchy
<input checked="" type="checkbox"/>	Use LZ1 compression for attachments
<input type="checkbox"/>	Don't allow headline monitoring
<input checked="" type="checkbox"/>	Allow more fields in database
<input checked="" type="checkbox"/>	Support Response Thread History
<input type="checkbox"/>	Don't allow simple search
<input checked="" type="checkbox"/>	Compress database design
<input checked="" type="checkbox"/>	Compress document data
<input type="checkbox"/>	Disable automatic updating of views
<input type="checkbox"/>	Disable export of view data

=> Load Compact -C -ZU -n -v

DAOS

- Domino Attachment and Object Service
- Kein Shared-Mail (!)
- Auslagerung der Anhänge (Keine Redundanzen mehr)
- Anhänge werden komprimiert und verschlüsselt (Server ID)

DAOS

- Grosse Harddisk Platzersparnis (30-70%)
- Entlastung der Server-Prozesse (Compact, Indexer)
- Reduzierte Backupzeiten (kleinere NSF, statischere Attachments)
- Transaction Log muss aktiv sein
- ODS Version 51
 - Notes.Ini: Create_R85_Databases=1

Backup mit DAOS

- Zuerst normaler Backup DAOS Verzeichnis (NLO Anhänge)
- Danach NSF Backup (Full / Incremental)

=> Load Compact -C -daos on

ID Vault

- Vollständiges Management der ID Dateien
- Gesteuert durch Security Policy
- Repository (mit Harvesting aller IDs)
- Password Recovery (Optional durch User)
- Synchronisation bei mehreren ID Dateien
- Voraussetzung: Notes 8.5+ Client

**Renovations web page - mock-up
with draft text**

Shawne, here is a chart showing a
mock-up of the Renovations web page --
including draft text for the main copy.
